## THE JURGENS STORY

Our goal is to create the best caravans possible through intelligent design, genuine build quality and comprehensive testing.

We place emphasis on safe and efficient towing through engineering strength in where it is needed and taking weight out where it is not. Our products are light but not the lightest. We take into account building in all the features Australians expect and making a product tough enough for Australian conditions.

We appreciate style and understand how to optimise space for practical and comfortable living.

We have locally designed and built thousands of caravans in Australia developed specifically for our market since 2008.

Plus every Australian built Jurgens Caravan carries the DNA of 60 years international manufacturing experience. We are part of one of the largest caravan manufacturers in the southern hemisphere. Jurgens has been manufacturing in South Africa since 1952 and have built over 100,000 caravans.

We back our product with an industry leading factory warranty. We encourage you to compare us against our competitors. We are confident we have a lot to offer.
